# Office Action Summary

Application No.

10/018,538

Applicant(s)

NORMAN, TIMOTHY HUGH

Examiner

Joshua L. Pritchett

Art Unit

2872

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 16 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 18-31 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 18-31 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 11 March 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: \_\_\_\_\_

### **DETAILED ACTION**

This action is in response to Request for Continued Examination filed February 16, 2005 and Amendment filed December 14, 2004. Claim 18 has been amended as requested by the applicant.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-22 and 24-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lang (US 5,604,644) in view of Lang (US 5,687,035).

Regarding claim 18, Lang '644 teaches a vehicle rear view mirror (Fig. 1) comprising a housing (2) and a mirror lens (11) carried by a location frame (12) rigidly mounted within and directly connected to the housing (Fig. 1), the frame and/or housing being made from a resilient material (col. 2 lines 44-57)) and the frame being a resilient snap-fit (Fig. 1; col. 2 lines 44-57) within the housing characterized in that the housing has a rim portion (at 21) within the frame is located. The nature of a snap-fit connection requires that the connection means have some

Art Unit: 2872

resiliency to be able to bend elastically and spring back into place to create the snap-fit. Lang '644 lacks reference to the frame and mirror being wholly located without extending over the outer edges of the rim portion. Lang '035 teaches a vehicle rear view mirror with a frame (60) and a mirror lens (86 and 87) located wholly within the outer edges of the rim portions of the housing (24). Lang '035 further teaches the frame rigidly attached to the housing (col. 5 lines 6-12). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the Lang '644 invention have the frame and mirror located wholly inside the housing as taught by Lang '035 for the purpose of shielding the frame from the weather to increase the usable life span of the rear view mirror.

Regarding claim 19, Lang '644 teaches the housing is provided with frame retainment means (21) and the frame is provided with housing engagement means (20).

Regarding claim 20, Lang '644 teaches the frame retainment means comprises one or more catches (21) and the housing engagement means comprises one or more abutments (20) which co-operated with the catches (Fig. 1).

Regarding claim 21, Lang '644 teaches the frame is provided with lens engagement means (13).

Regarding claim 22, Lang '644 teaches the lens engagement means comprises one or more abutments (13) adapted to the lens.

Regarding claim 24, Lang '644 teaches the frame is made from a resilient synthetic plastics material (col. 1 line 16).

Regarding claim 25, Lang '644 teaches the housing comprises a casing (2) adapted to cover the rear face of the lens (Fig. 1).

Art Unit: 2872

Regarding claim 26, Lang '644 teaches the lens is convex (Fig. 1).

Regarding claims 27 and 28, Lang '644 teaches the lens is of a substrate on which reflective surface may be deposited; specifically glass (col. 2 line 31).

Regarding claim 29, Lang '644 teaches the frame is provided with slots (23) at each corner to provide further resilience to the frame.

Regarding claim 30, Lang '644 teaches the housing and the frame are releasably detachable (col. 1 lines 56-60).

Regarding claim 31, Lang '644 teaches the housing is provided with means to receive a mounting attached to a vehicle (3).

Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lang '644 in view of Lang '035 as applied to claim 21 above, and further in view of Grissen (US 4,826,306).

Lang '644 in combination with Lang '035 teaches the invention as claimed but lacks reference to the use of a lens being a resilient snap-fit into the frame. Grissen teaches a vehicle rear view mirror (11) with a lens (12) that is a resilient snap-fit (Fig. 2) in a frame (21). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to have the Lang '644 invention include the snap-fit lens of Grissen for the purpose of eliminating the need for gluing the lens into the frame.

### ***Response to Arguments***

Art Unit: 2872

Applicant's arguments, see Amendment, filed December 14, 2004, with respect to the rejection(s) of claim(s) 1 under Lang '644 have been fully considered and are persuasive.

Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Lang '035. Applicant argued that the Lang '644 reference fails to teach the mirror lens and frame wholly inside the rim portion of the housing. The examiner agrees, however Lang '035 does teach the claim limitation as stated above.

### *Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joshua L. Pritchett whose telephone number is 571-272-2318. The examiner can normally be reached on Monday - Friday 7:00 - 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew A. Dunn can be reached on 571-272-2312. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

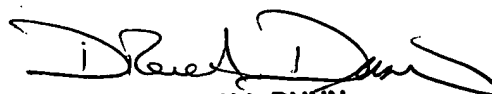

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
